Description

Download this image file and find the flag.

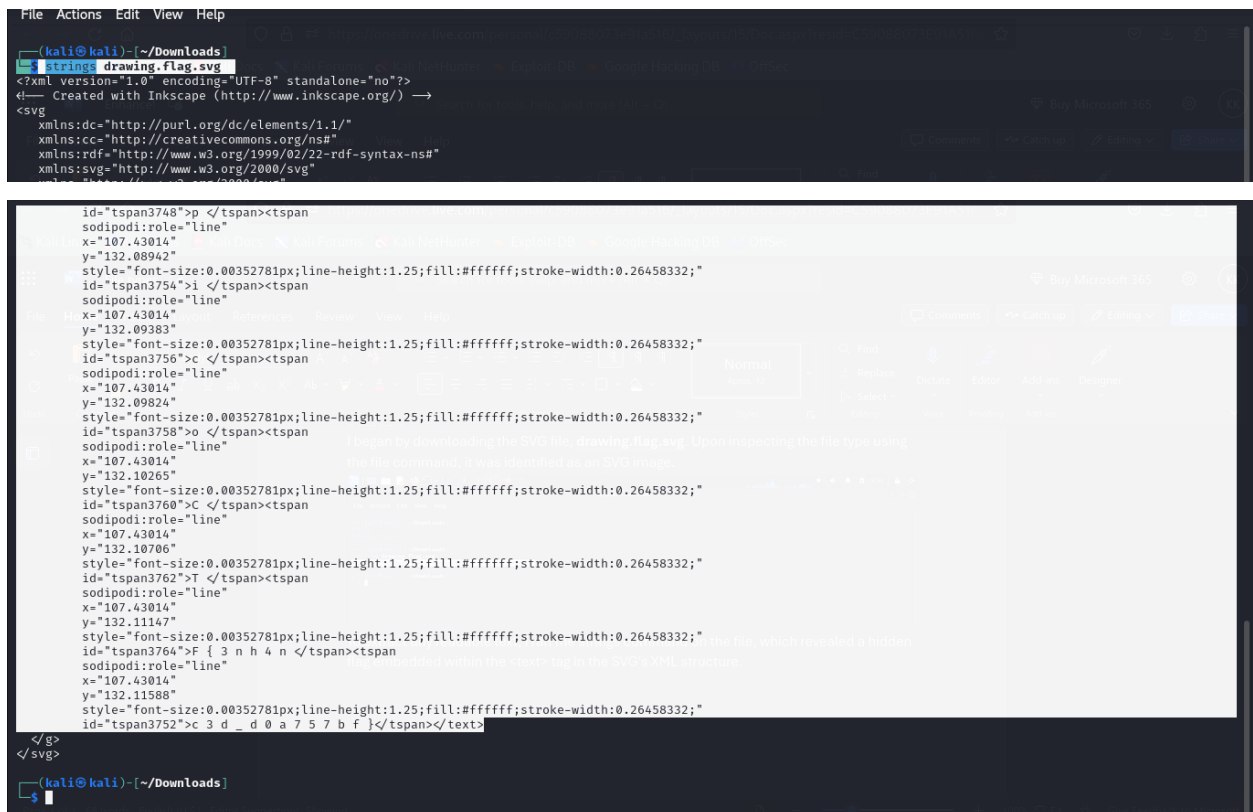

- Download image file

Solution

I began by downloading the SVG file, **drawing.flag.svg**. Upon inspecting the file type using the file command, it was identified as an SVG image.

To extract any readable text, I ran the strings command on the file, which revealed a hidden flag embedded within the <text> tag in the SVG's XML structure.

Flag: **picoCTF{3nh4nc3d_d0a757bf}**
