Description

Cryptography can be easy, do you know what ROT13 is? `cvpbPGS{abg_gbb_onq_bs_n_ceboyzz}`

Hints ?

This can be solved online if you don't want to do it by hand!

Solution

ROT13 is a letter substitution cipher that replaces a letter with the 13th letter after it in the alphabet. I went ahead and used online rot13 cipher tool and the decoded flag was `picoCTF{not_too_bad_of_a_problem}`.

```
cvpbPGS{abg_gbb_onq_bs_n_ceboyzz}
