Description

Can you find the robots? <https://jupiter.challenges.picoctf.org/problem/56830/> (link) or <http://jupiter.challenges.picoctf.org:56830>

Hints: What part of the website could tell you where the creator doesn't want you to look?

Solution

The file that website creators would not like being public is called **robots.txt**. I went ahead and examined it via the browser.

This file revealed another html page. I tried accessing it to and I found the hidden flag.
