Description

1 2

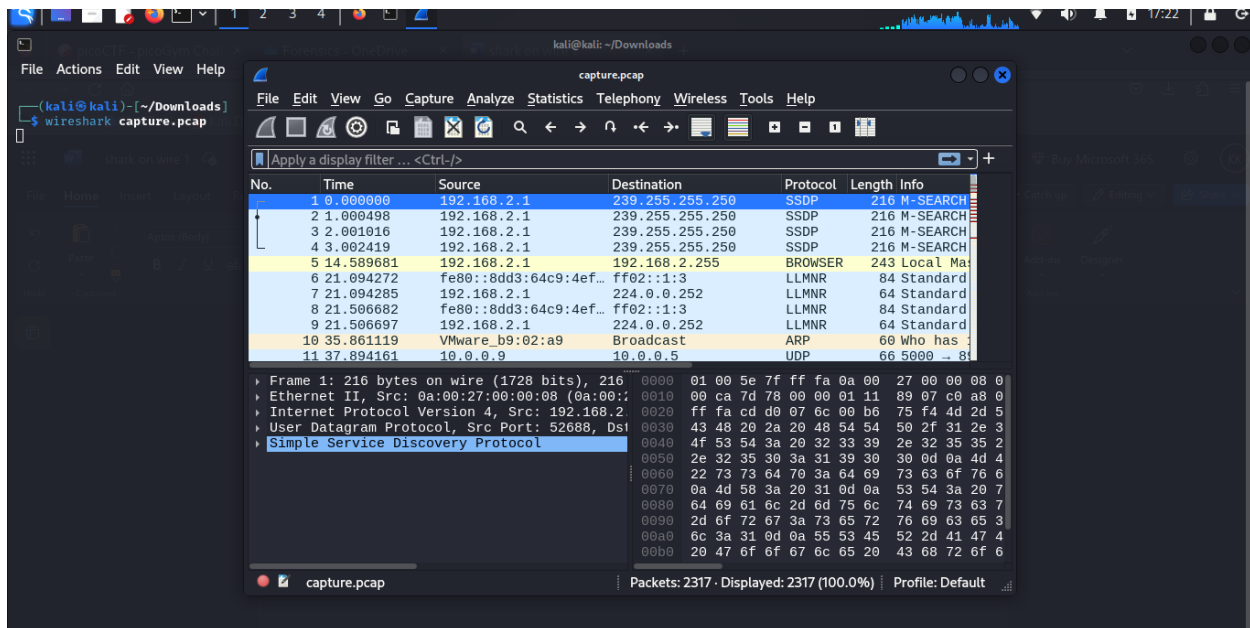

We found this [packet capture](#). Recover the flag.

Solution

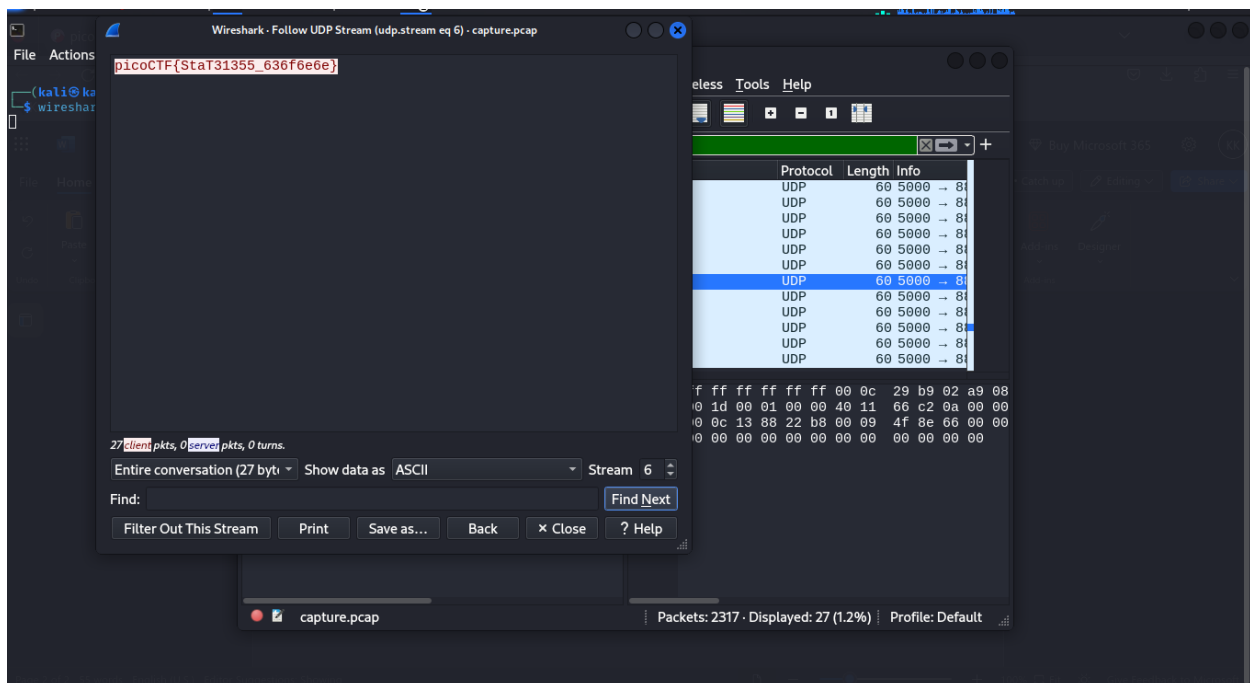

I downloaded the capture file.

I then opened the capture file on **Wireshark** a tool for we use when analyzing network traffic.

Then to analyze the captured packets, I clicked the navigate tab and followed the udp stream where I can across a stream with the flag string.

The flag was **picoCTF{StaT31355_636f6e6e}**
