Can you get the flag? Go to this website and see what you can discover.

*Hint: Is there more code than what the inspector initially shows?*

Solution

The goal here was to examine all the source code for all the pages in this website.

The website html source code had nothing interesting. SO, i went ahead and examined code for other files that are included in this website. The challenge name was a hint to.

Script.js revealed a partial flag "f7w_2of2_b8f4b022}"

I went ahead and examined the CSS file containing the styling for the html components to where

i found the other part of the flag " picoCTF{1nclu51v17y_1of2_" and that's how i found the complete flag " picoCTF{1nclu51v17y_1of2_ f7w_2of2_b8f4b022}
